Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository](#).

Owner *

projetoalfobre ▾

Repository name *

repository ✓

Great repository names are short and memorable. Need inspiration? How about [an interesting umbrella?](#)

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Click this step if you're importing an existing repository.

Add a README file

This is where you can write a long description for your project. [Learn more](#).

Add .gitignore

Choose which files not to track from a list of templates. [Learn more](#).

.gitignore template: None ▾

Choose a license

A license tells others what they can and can't do with your code. [Learn more](#).

License: None ▾

This will set main as the default branch. Change the default name in your [settings](#).

You are creating a public repository in your personal account.

Create repository

Na página de criação de um novo repositório,

1) escolha um **nome** para o repositório

2) Ative a opção para inicializar o repositório com ficheiro **README**

3) Clique em **Criar** repositório

repository /

Drag files here to add them to your repository

Or [choose your files](#)

Arraste os ficheiros e/ou pastas com ficheiros (não podem estar vazias!) para a área indicada.

No nosso caso, arrastamos um ficheiro JPG e uma pasta que tem lá dentro outro ficheiro JPG.

Commit changes

Add files via upload

Add an optional extended description...

☒ Commit directly to the `main` branch.

☐ Create a new branch for this commit and start a pull request. [Learn more about pull requests.](#)

Commit changes

Add files via upload

Add an optional extended description...

☒ Commit directly to the `main` branch

☐ Create a new branch for this commit and start a pull request. [Learn more about pull requests.](#)

Commit changes

Cancel

No fim do upload, surge uma **lista** com todos os ficheiros carregados.

No exemplo, um dos ficheiros está na raiz do repositório e o outro está dentro da pasta *pb*.

Para concluir o processo, tem clicar em **Commit changes**.

Se quiser, pode escrever texto associado a esta operação.

The screenshot shows the GitHub interface for a repository named 'projetoalfobre'. At the top, there's a navigation bar with links for Pull requests, Issues, Codespaces, Marketplace, and Explore. Below this, the repository name 'projetoalfobre / repository' is displayed, along with buttons for Pin, Unwatch (1), Fork (0), and Star (0). The main content area is divided into two columns. The left column shows the repository's file structure: a 'main' branch with 1 branch and 0 tags, and a list of files and folders. A red box highlights the file list, which includes a folder named 'pb', a file named 'README.md', and a file named 'cavaleiro_cor.jpg'. A red box also highlights the commit information, showing a commit by 'Zee' 23 seconds ago with 2 commits. The right column shows the 'About' section, which includes a description, a README link, 0 stars, 1 watching, and 0 forks. Below this, there are sections for Releases, Packages, and Environments. The 'Environments' section shows 'github-pages' as 'Active'. Annotations with arrows point from text boxes to specific elements: one points to the file list, another to the commit information, and a third to the 'github-pages' environment.

Depois, será conduzido à página principal do seu repositório.

Repare que existem novos ficheiros.

Pode navegar no repositório clicando nos nomes das pastas e dos ficheiros.

Quando este sinal passar a verde, os seus ficheiros também ficam disponíveis via web.

Search or jump to...

Podemos navegar através dos **breadcrumbs**.

Clicando no ficheiro, acedemos ao ficheiro dentro do repositório. Nem todos os ficheiros permitem pré-visualização!

Podemos **descarregar** e **apagar** o ficheiro.

 https://projetoalfobre.github.io/repository/cavaleiro_cor.jpg

Ambas as imagens estão agora online.

A outra imagem que está dentro da pasta “pb” ficará disponível através do URL https://projetoalfobre.github.io/repository/pb/cavaleiro_pb.jpg.

O URL das imagens segue o modelo:

<https://nome-da-conta.github.io/nome-do-repositório/nome-da-imagem>

Pode fazer upload de outros tipos de ficheiros: svg, pdf, docx, shp, etc.

Últimas sugestões

Personalize a sua conta.

Utilize um cliente em vez da interface web: **Github Desktop**, Git Cola, Etc.
